## PROFILE

A highly skilled Software Engineer with over 5 years of experience in designing, developing, and deploying scalable web applications. Proficient in full-stack development with expertise in backend technologies such as Laravel, as well as modern frontend frameworks. Adept at collaborating with cross-functional teams, improving application performance, and implementing responsive designs. Strong background in problem-solving and delivering high-quality code, with a focus on best practices, security, and user experience.

## WORK EXPERIENCE

### IT Clan BD

Laravel Web Apps Developer

MAY 2021 - PRESENT

- Contribute to a leading software and web design company in Bangladesh by developing custom web applications and features based on client requirements.
- Implement multi-tenancy architecture, enabling a single instance of software to serve multiple user groups with distinct access rights and permissions. This allows effective user segmentation, security, and scalability for the application.

### ICT Layer

Software Developer

MAR 2019 - APR 2021

- Created detailed reports with multi-functional capabilities, including summary views and drill-downs for on-demand data analysis.
- Developed and maintained high-performance, scalable web applications using modern frameworks, ensuring security and efficient performance.
- Designed backend architecture and optimized database interactions to support seamless integration between systems, APIs, and third-party services.
